**Attachments:** removed.txt

Thanks for the reminder Chris. Here are my comments that do not require an additional response:

1. Edit – Page 26, Section 4.3.1, first paragraph. Change “folk” to “fork” in the third sentence.
2. Edit – Page 27, Section 4.3.2, second paragraph. Last sentence add a “to” in front of “Source Area 39B.”
3. Page 27, Section 4.3.2, third paragraph. A good initial screen would have been a comparison to background for the four metals. Those below background would not need further analysis.

Page 34, Response to Comment 14. It would be appreciated if the statement that the background dataset and analysis approach presented in the BOU HHRA was “approved” by the agencies was no longer used. As provided on several occasions, Regional Board staff did not approve that approach. During our review of the document it was initially presented that the 2007 Background Metals report was used. As we had already reviewed and approved that report, we did not fully review the appendix in the BOU HHRA that contained the approach revisions. We have made this clear in our review comments on several other risk assessments and RIs that have come to us since. As Area 40 does not have metals of concern and this issue is moot, we will not belabor this any further. This also

**Subject:** Area 40 - Responses to Agency Comments on Draft HHERA

Hi Everyone – Attached are Aerojet Rocketdyne's responses to your comments on the Area 40 Draft Human Health and Ecological Risk Assessment. Please review and comment. Once all responses are adequately addressed, we will incorporate the responses and finalize the report.

Thanks, Chris
